

## **Local Doctor Recognized as Invisalign® Premier Provider**

Walnut Creek, October 15<sup>th</sup>, 2007- Dr. Paula Roemer of Walnut Creek, CA has been recognized as an Invisalign Premier Provider, placing her among approximately the top five percent of Invisalign practitioners in North America. Each year, Align Technology, Inc., the inventor of the Invisalign system, a clear, removable method of straightening teeth without wires and brackets, awards Premier Provider status to a select group of Invisalign practitioners in the U.S. and Canada. To qualify, doctors must demonstrate an exceptional level of Invisalign experience and keep current on the latest Invisalign techniques.

“We are extremely excited about the results from Invisalign. Premier Provider status indicates to our patients and to the community that not only are we among the most experienced Invisalign practices in the country, but we are also committed to staying current with the latest Invisalign treatment techniques,” said Dr. Roemer. “That leadership reflects the standard of care that patients can expect from our practice.”

Dr. Roemer has been practicing for more than 20 years and has been treating patients with the Invisalign system since 2005. Invisalign is a nearly invisible, comfortable, and convenient treatment option for patients who want straighter teeth. To learn more about Invisalign treatment or to schedule a free consultation, please call Dr. Paula Roemer at Smile!WalnutCreek.
